

HOSTAPHAN®

Preliminary data sheet

Hostaphan® GUV 4600

Glass clear, UV stable polyester film

Hostaphan® GUV 4600 is a glass clear film made of polyethylene terephthalate (PET) for outdoor applications and UV absorption. It is characterized by its very high resistance against and superior absorption of UV radiation. Good bonding strength is achievable with coatings and metal layers. Further excellent properties are its high mechanical strength, dimension stability and very smooth, glossy surface.

Hostaphan® GUV 4600 is one side chemically treated for improved slip as well as for improvement of the adhesion of coatings and printing inks.

Typical properties

MD = Machine direction, TD = Transverse direction

Applications:

- Outdoor use
- Protection against UV radiation
- Coating
- Printing e.g. for surface layers, packaging materials, reinforcement.

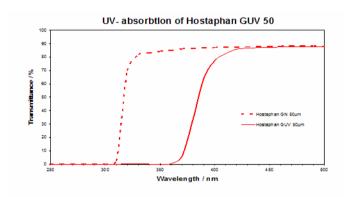

HOSTAPHAN®

Hostaphan® GUV 4600 can easily be coated or printed with functional layers. The film is slip coated for high speed processing.

GUV 4600: one side treated, treated side wound out.
